Measures of frequency	<ul style="list-style-type: none"> - Percentage of children among total population, by territorial authority - Number of children among total population, by territorial authority
Limitations of data source	<ul style="list-style-type: none"> - Stats NZ has noted that the 2018 Census had a lower than expected response rate resulting in the introduction of new methods to produce the dataset, including using data from alternative sources. Stats NZ and the 2018 Census External Data Quality Panel (EDQP) have produced a rating system to help the users understand the quality-related issues and impacts of the 2018 Census dataset. - EHI have decided to update this factsheet based on the documentation relating to the 'Age' indicator. The EDQP rating for this indicator was 'very high', and the response rate was 84.7%. Additional information came from the following sources: 4.1% from the 2013 Census, 10.9% from administrative data sources, and 0.3% from statistical imputation. Further information about the Stats NZ and EDQP documentation can be found in https://www.stats.govt.nz/2018-census/data-quality-for-2018-census
