

| Information topic | Details |
|--------------------------------|--|
| Indicator name | Number of motor vehicle registrations, by vehicle type and fuel type |
| Domain and topic | Air Quality: Motor vehicles Transport: Motor vehicles |
| Indicator definition and units | Number of motor vehicle registrations in New Zealand, by type. Vehicle types include: <ul style="list-style-type: none"> - Light motor vehicles (light passenger vehicles and light commercial vehicles) - Electric vehicles |
| Data source | Ministry of Transport: Monthly electric vehicle registrations |
| Time period and time scale | Monthly; from 2014 onwards |
| Population coverage | All vehicles on the Motor Vehicle Register, excluding those that are exempt from having a license (not used on roads) and those that have an expired license (if the license has not been renewed within 6 months). |
| Measures of frequency | Percentage of light vehicle registrations that are electric vehicles |
| Limitations of indicator | Factsheets based on 2016 data onwards should not be compared with earlier published factsheets (see 'Limitations of data source' below). |
| Limitations of data source | From July 2016, the number of motor vehicle registrations may differ from previous factsheet. NZTA implemented better methods to recognise electric vehicles in the register, therefore identifying more electric vehicles. |
| Created by | Ministry of Transport New Zealand |
| Related indicators | <ul style="list-style-type: none"> - Number of motor vehicles in the fleet, by vehicle type and fuel type - Average age of vehicle fleet |
