EXECUTIVE SUMMARY

The report identifies the unmet health and healthcare needs of the West Coast District Health Board (DHB) population by comparing the health status of Māori and non-Māori. The information contained in the report has been designed to assist the West Coast DHB in determining priorities for its planning and decision-making to achieve health gain in its population.

Demographics and social determinants of health

In the 2006 Census, West Coast DHB had a population of 32,100, which is predicted to fall to 32,080 by 2026. The proportion of people identifying themselves as Māori in West Coast DHB is lower than that of New Zealand as a whole. The Māori population in West Coast DHB is younger than the non-Māori population and is dominated by young people. This trend is expected continue over the period to 2026, whilst the non-Māori population is predicted to age over the same period.

In West Coast DHB, the distribution of communities across the NZDep06 deprivation scale is dominated by the mid deprivation deciles. The pattern of distribution is similar for Māori and non-Māori.

Health status

Avoidable mortality and hospitalisations

There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable mortality.

Ischaemic heart disease was the leading cause of avoidable mortality for Māori, compared to suicide and self-inflicted injuries for non-Māori.

There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable hospitalisations in the DHB.

Respiratory infections, dental conditions, and ENT infections were three of the five leading causes of avoidable hospitalisations for both Māori and non-Māori.

The age-standardised rates for unintentional injury mortality in the DHB were not statistically significantly different from the national rates.

The Māori age-standardised rates for unintentional injury hospitalisation in the DHB were not statistically significantly different from the non-Māori rates.

Child and youth health

Four of the top five leading causes of hospitalisations for Māori and non-Māori children 0-4 years were similar: respiratory infections, disorders related to length of gestation and fetal growth,

¹persons encountering health services in other circumstances, and gastro-oesophageal reflux disease.

For both Māori and non-Māori children aged 5-14 years, leading causes of hospitalisation were: asthma, dental conditions, respiratory infections, injuries to the elbow and forearm, and ENT infections.

Older people

COPD, disorders of lens, disorders of gallbladder, biliary tract and pancreas, and stroke were leading causes of hospitalisations for Māori 65+ years of age, compared to respiratory infections, COPD, disorders of lens, and angina for non-Māori.

Angina and ischaemic heart disease were leading causes of hospitalisation for males 65+ years of age, not for females.

Other health conditions

The COPD hospitalisation rate for Māori was statistically significantly higher than the non-Māori rate as well as between West Coast DHB and the national rate.

The unintentional injury hospitalisation rate for Māori youths (15-24 years) was statistically significantly higher than that for non-Māori.

In the West Coast DHB, the rate of hospital admissions due to falls was statistically significantly lower for children 0-14 years than the national rate.

Health service utilisation

The immunisation coverage for Māori in the West Coast DHB was similar to the national rate, whereas the non-Māori coverage was considerably lower than the New Zealand average.

Influenza vaccine coverage for Māori 65+ years of age was considerable higher than the national average, whereas the converse occurred for non-Māori.

Both the Māori and non-Māori breast screen coverage were considerably higher than the overall New Zealand coverage.

The Māori cervical cancer screening rate was lower than the national Māori average as well as the non-Māori coverage.

¹ Persons encountering health services in other circumstances (Z70-Z76) - Health supervision and care of other healthy infant and child.

INTRODUCTION

A health needs assessment (HNA) is an analysis of a population's demand and need for health services. Health needs assessments can help create a picture of the health status of District Health Board (DHB) population at a given time.

The current HNA compares the health status between Māori and non-Māori by providing a descriptive analysis of the data, with the statistical information accessible in an easy-to-use format. The most recent data available are presented for each indicator. The report, along with the full suite of data tables that sit behind the figures and text, will be available on CPHROnline (<http://cphronline.massey.ac.nz/>). This is an interactive website which displays a wide range of downloadable public health data in tabular, graph and map formats. CPHROnline also has the capacity to display time trends by DHBs on major health risk factors, behaviours and conditions.

It is intended that this profile of Māori and non-Māori health will provide the basis for a continuous updating of the data on CPHROnline as new data becomes available from the national health data sets (i.e. mortality, hospitalisations, and cancer registrations).

In this HNA, information is presented about the West Coast DHB on:

1. Demographic characteristics.
2. Socioeconomic characteristics.
3. The health status, such as rates of cancer, and diabetes.
4. Health service utilisation

The findings of the HNA are summarised in the executive summary, together with key points at the beginning of each chapter. It is anticipated that the information in the report will provide robust, high quality evidence for policy development and decision making across the health sector. It will enable decision makers to lead and manage effectively by being able to respond quickly to a population's health needs and emerging issues of their respective DHB.

METHODS AND DATA SOURCES

Data Notes

In the report, information is presented on the most recently available data from a variety of sources (Table 1).

Table 1: Data sources for numerators

Source	Data	Period	Type of data
Ministry of Health	Mortality collection data set- mortality	2006-2008	National collection
	National Minimum Data Set (NMDS)- hospitalisations	2007-2009	National collection
	New Zealand Cancer Registrations (NZCR)- cancer registrations	2005-2007	National collection
Statistics New Zealand	Demographics Population	2006	Census
	projections	2006-2026	Official Estimates
	Socioeconomic indicators	2006	Census
District Health Board New Zealand (DHBNZ)	Vaccinations	2009-2010	Primary care
	Breast Cancer Screening	2009-2010	Primary care
	Cervical Cancer Screening	2009-2010	Primary care

Identifying the Years of Data Collection

In this report '2006-08' denotes three full calendar years of data for mortality, cancer registrations '2005-07', and hospitalisation data are for years '2007-09'.

National Collections

The Ministry of Health has operational responsibility for national collections of health and disability information which include the mortality collections, national minimum data set (NMDS), and the New Zealand Cancer Registry (NZCR). National collections and systems provide valuable health information to support decision-making in policy development, funding and the point of care. Further information about the national systems can be obtained from the website:

<http://www.health.govt.nz/nz-health-statistics/national-collections-and-surveys/collections>

Disease Classification

The International Classification of Disease Australian Modification, 10th revision (ICD-10-AM) has been used to identify diseases/conditions for reporting mortality, hospitalisations and cancer registrations (refer to Appendix 5 for a full list of ICD-10-AM codes).

Ethnicity Classification

Ethnicity data are presented in two ways; 'total response' and 'prioritised'. In 'total response', a respondent is counted in each of the ethnic groups they selected. This means that the sum of the ethnic group population will exceed the total population because people can select more than one ethnic group.

In the 'prioritised' method, each respondent is allocated to a single ethnic group using the priority system (Māori > Pacific peoples > Asian > European/Other). For example a person who selects (when asked their ethnicity) both Māori and European would only be included in the Māori grouping.

Prioritised ethnicity classifies a person as Māori if any one of their recorded ethnicities was Māori. So for Māori, prioritised and total response outputs are the same. All other people were recorded as non-Māori and represent a comparative or reference group.

Denominators

Population information was obtained from Statistics New Zealand. In general the denominators used for calculating the rates were derived from 2006 Census population data. Any other denominators used are indicated in the tables.

Rates

Rates are calculated as the proportion of the population associated with the indicator compared with the total population of interest. Rates are expressed per 100 (percent), per 1000, per 10,000 or per 100,000. Age-specific rates are shown for defined age groups.

In this report, rates have not been calculated for counts less than 5. These have been presented as 0.0 in this report.

Age-standardised Rates (ASRs)

Where appropriate and indicated in the tables, rates have been age-standardised to enable comparison between population groups with different age structures. The standard population used was the 2001 Census Māori population (males and females combined) using five-year age groups up to 84, then 85+. Use of a Māori population standard creates rates that are a close approximation of the crude overall rates for Māori and thus better reflect the experience of the Māori population.

Confidence Intervals

In the report, 95% confidence intervals for the rates are presented, where appropriate. The confidence interval gives an indication of the margin of error associated with the rate estimates. When the 95% confidence intervals of two rates do not overlap, the difference in rates between the groups is said to be statistically significant with 95% confidence.

Larger populations and more common conditions usually have narrower confidence intervals and so have a greater likelihood of achieving a statistically significant difference than results with smaller numbers.

Certain cells within the mortality, hospitalisation, and cancer registration tables (see Appendices 2-4) have been shaded to indicate whether the age-standardised rates (ASR) between two groups are statistically significant. The two comparisons being made are:

Māori ASR compared to non-Māori ASR within District Health Board:

Māori ASR statistically significantly higher than non-Māori ASR

Māori ASR statistically significantly lower than non-Māori ASR

District Health Board ASR compared to New Zealand ASR:

DHB ASR statistically significantly higher than national ASR

DHB ASR statistically significantly lower than national ASR

Ranking of Leading Causes

Ranking the leading causes of mortality and hospitalisations indicates the most frequently occurring causes of death or hospitalisation by using the ASR as the ranking criterion.

How to interpret tables in this report

The blue shades highlights differences between Māori and non-Māori within the District Health Board

The red/pink shades highlights differences between the District Health Board and New Zealand

Explains what the table is about, and that the data is age-standardised

Age-Standardised Rate for the female Māori population in the DHB

The 95 percent confidence interval of the age-standardised rate – and indicator of margin of error

Table 2.1.17: Ischaemic heart disease mortality, 65+ years, age-standardised rate per 100,000 (and 95% confidence intervals), 2006-08

		Māori		non-Māori		Total	
		ASR	95% confidence	ASR	95% confidence	ASR	95% confidence
DHB	Female	863.7	749.8 - 977.7	536.3	521.5 - 551.0	541.1	526.6 - 555.6
	Male	550.1	463.9 - 636.3	718.4	698.2 - 738.6	721.0	701.3 - 740.8
	Total	919.1	824.6 - 1013.7	622.3	610.1 - 634.5	626.8	614.9 - 638.8
New Zealand	Female	893.9	878.3 - 909.5	394.7	392.6 - 396.7	422.3	420.2 - 424.4
	Male	1416.1	1393.1 - 1439.1	728.8	725.4 - 732.2	765.7	762.3 - 769.1
	Total	1123.8	1110.5 - 1137.0	545.4	543.5 - 547.3	577.2	575.2 - 579.1

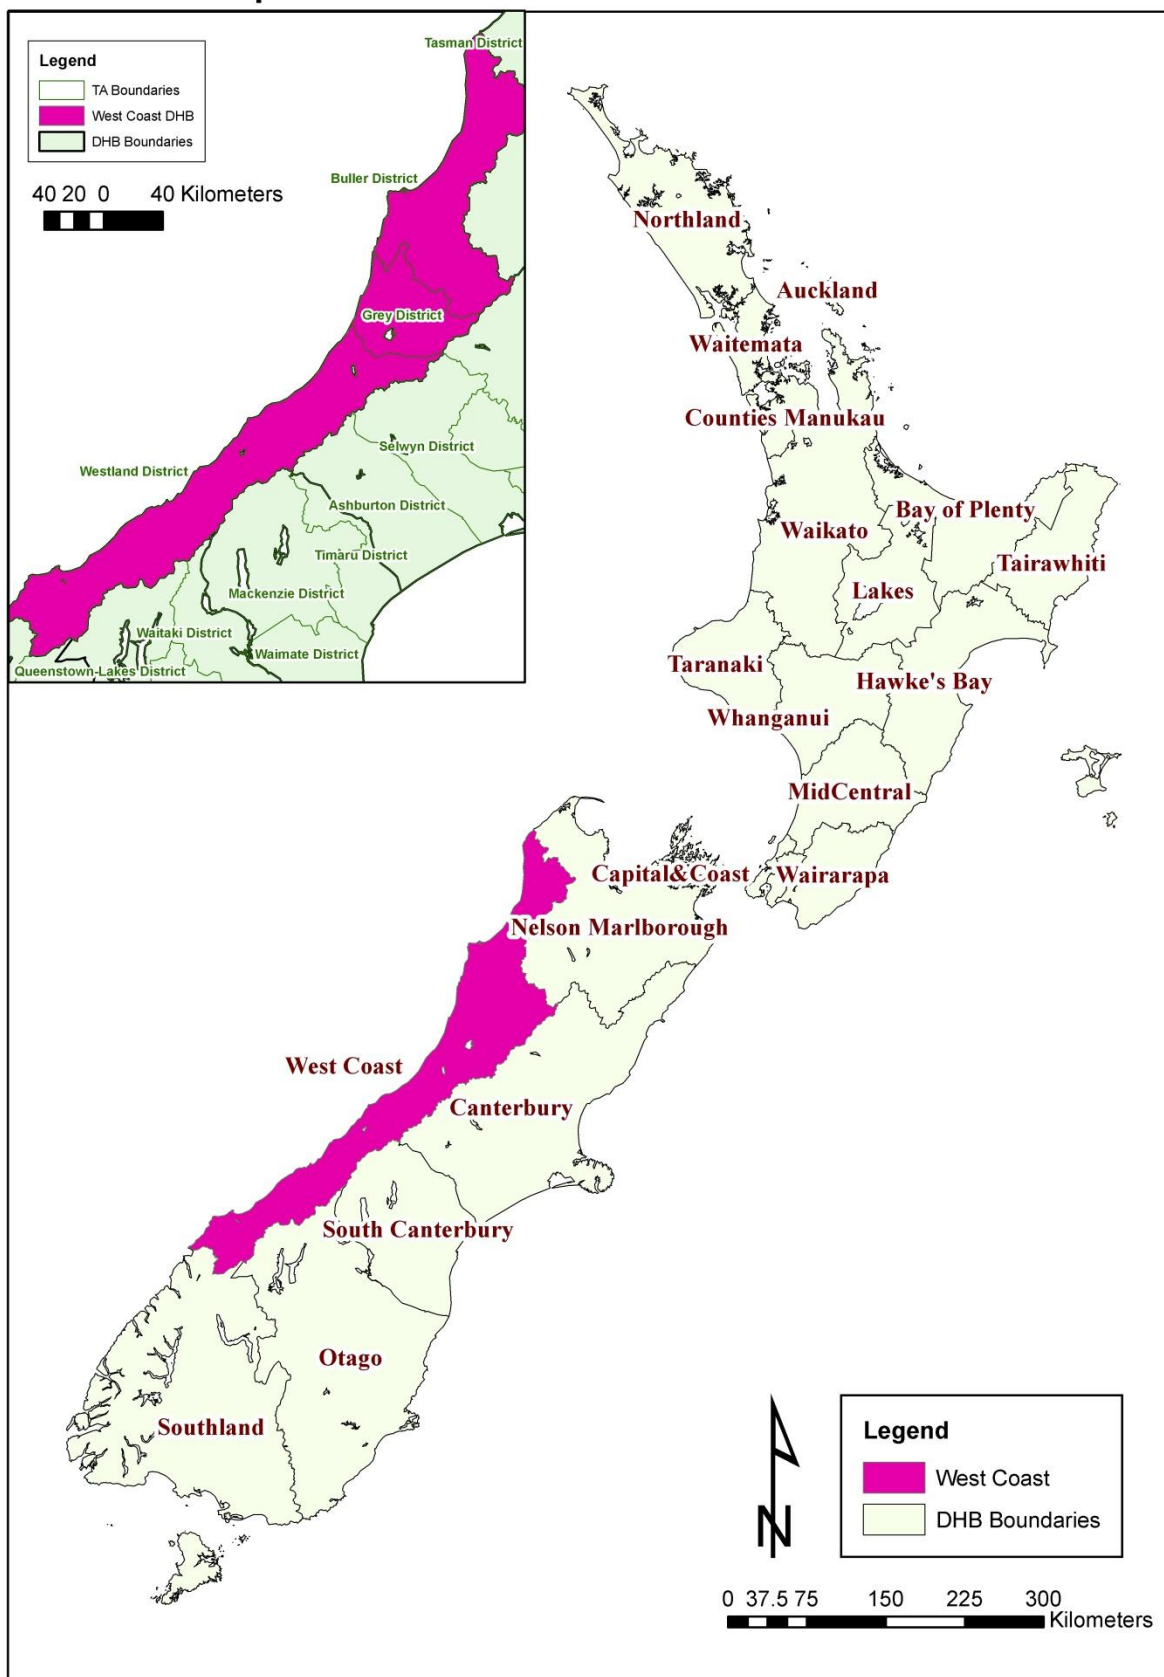

The dark blue shows that the ASR for the total Māori population in the DHB (919.1 per 100,000) is statistically significantly higher than the ASR for the total non-Māori population in the DHB (622.3 per 100,000)

The light blue shows that the ASR for the male Māori population in the DHB (550.1 per 100,000) is statistically significantly lower than the ASR for the male non-Māori population in the DHB (718.4 per 100,000)

The red shows that the ASR for the total population in the DHB (626.8 per 100,000) is statistically significantly higher than the ASR for the total population in NZ (577.2 per 100,000)

The pink shows that the ASR for the total male population in the DHB (721.0 per 100,000) is statistically significantly lower than the ASR for the total male population in NZ (765.7 per 100,000)

Map of New Zealand District Health Boards

1 THE POPULATION

West Coast DHB had a population of 32,100 at the last (2006) census, making up approximately 0.8 percent of the total New Zealand population (4,184,580 at the last census). This population is projected to fall to 32,080 by 2026, a decrease of 0.1 percent. The New Zealand population is predicted to increase by 19.2 percent over the same period.

1.1 Ethnicity

The proportion of people identifying themselves as Māori in West Coast DHB is lower than that of New Zealand as a whole, (9.8% compared to 14.6%). This represents 0.5 percent of the New Zealand Māori population (2006 Census).

1.2 Population Distribution by Age and Gender

The majority of the West Coast DHB population (65.8%) are of working age (15-64 years), this makes up a slightly lower proportion of the population compared to New Zealand as a whole (66.5%), (Table 1.1). There is a slightly smaller proportion of young people (aged 0-14 years) and slightly more elderly (aged 65+ years) in the West Coast DHB when compared to the New Zealand population. The West Coast DHB population has two distinctive peaks at 10-14 years and 40-44 years, (Figure 1).

Table 1.1: Percentage population, age and gender, 2006 Census, 2026

Location	Age Group	2006(Base Population)			2026 (Projected Population)		
		Male	Female	Total	Male	Female	Total
West Coast	0-14	20.7	19.9	20.3	17.7	17.3	17.5

	Total	16280	15800	32100	16320	15810	32080	0.2	0.1	-0.1
New Zealand	0-14	454960	433360	888310	477070	451780	928840	4.9	4.3	4.6
	15-64	1364450	1420210	2784650	1545220	1573770	3119010	13.2	10.8	12.0
	65+	228930	282690	511620	440280	503800	944080	92.3	78.2	84.5
	Total	2048340	2136260	4184580	2462570	2529350	4991930	20.2	18.4	19.3

It is projected that by 2026, the proportion of the population in the 65+ age group will have increased by 86.6 percent in West Coast DHB, similar to the 84.5 percent predicted nationally. Populations of both young people and those of working age are predicted to decrease by 14.0 percent and 14.1 percent respectively. Trends for the rest of New Zealand are for small increases in these two age groups (of 4.6% and 12.0% respectively). The population is predicted to age considerably over the period to 2026, with peak population increasing to 60-64 years. Two smaller population peaks occur at 10-14 years and 30-39 years.

Figure 1: Population, age and gender, 2006 Census

Figure 2: Projected population, age and gender, 2026

1.3 Population Distribution by Ethnicity

The West Coast DHB Māori population is younger than the non-Māori population. The Māori population is dominated by young people, with peak population occurring at 10-14 years, a secondary peak can be seen at 40-44 years. Due to the overall low population count for Māori, differences in numbers between the sexes (a larger young male population and a larger middle aged to elderly female population) have become exaggerated. The non-Māori population is more numerous (giving the appearance of a more even distribution of the population between the sexes) and older in structure. Peak population occurs at 45-49 years, with a smaller, secondary, peak at 10-14 years.

Figure 3: Māori population, age and gender, 2006 Census

Figure 4: Non-Māori population, age and gender, 2006 Census

Over the period 2006-2026, the young (aged 0-14 years) and working age (15-64 years) Māori populations are predicted to increase by 7.0 percent and 18.7 percent respectively. By contrast the young and working age non-Māori populations are predicted to decline over the same period (by 18.4% and 17.3%). The greatest population increase occurs in the elderly population for Māori (261.5%). The non-Māori elderly population also increases (by 81.3%). This is predicted to lead to an overall increase in the Māori population of 24.5 percent, and a decrease in the non-Māori population of 2.7 percent.

Whilst young people are predicted to continue to dominate the Māori population (peak age 0-4 years), two other distinctive peaks can be seen, (at 30-34 years and 60-64 years). The non-Māori population is predicted to age considerably over the period 2006-2026, with peak population increasing to 65-69 years.

Table 1.3: Māori population change, age and gender, 2006 Census, 2026

2 SOCIAL DETERMINANTS OF HEALTH

The World Health Organisation defines the social determinants of health as:

“..The circumstances, in which people are born, grow up, live, work and age, and the systems put in place to deal with illness. These circumstances are in turn shaped by a wider set of forces: economics, social policies, and politics”, (World Health Organisation, 2008).

The following section examines social and economic determinants of health through the New Zealand Index of Deprivation and through some of the individual indicators used to determine ‘deprivation’ in New Zealand.

2.1 The New Zealand Index of Deprivation (NZDep06)

The New Zealand Index of Deprivation (NZDep06) provides a numerical rating of socio economic status by small area unit. This is based on nine indicators taken from the 2006 Census and across eight dimensions of deprivation. The numerical scale is divided into population deciles with 1 representing the least deprived and 10 representing the most deprived, (Salmond, Crampton, & Atkinson, 2007).

In West Coast DHB the distribution of communities across the NZDep06 deprivation scale is dominated by the middle deciles. Whilst showing no trends, the pattern of distribution across the deprivation scale is very similar for the Māori and non-Māori populations, although relatively more Māori are represented in the higher deprivation deciles and more non-Māori are represented in the lower deprivation deciles. This distribution is very different from national trends.

Figure 7: Distribution of West Coast DHB Area Units across NZDep06 Decile Groups, 2006 Census

Figure 8: West Coast DHB population, ethnicity and NZDep06 Decile

Figure 9: New Zealand population, ethnicity and NZDep06 Decile

2.2 Education

The population of West Coast DHB has a much smaller proportion of university graduates (degree level and above) (6.6%), compared to the New Zealand population (14.2%). It also has a higher rate of people with no qualifications (32.0% compared to 22.4% for New Zealand).

2.3 Income

The West Coast DHB population has a lower proportion of the population earning over \$30,000 in personal income; 31.0 percent compared to 37.3 percent for New Zealand. This represents a lower proportion of people earning around or above the average annual personal income in New Zealand, which stood at \$33,189 in 2006/07 (Statistics New Zealand, 2012).

2.4 Employment

The employment rate for the West Coast DHB population is higher than that for New Zealand (96.7% compared to 94.9%). In terms of type of employment, there is a lower proportion of professionals and managers on the West Coast (30.2% compared to 36.0% nationally) and a higher proportion of machine operators and labourers (26.0% compared to 16.8% nationally).

2.5 Housing Tenure

More people own or part-own their own home, or hold it in family trust, and fewer rent in the West Coast DHB when compared to New Zealand.

Table 2.1: Proportion of DHB households, housing tenure, 2006 Census

	Unit	Total, dwelling owned or partly owned by usual resident(s)	Total, dwelling not owned or partly owned by usual resident(s)	Total, dwelling held in a family trust by usual resident(s)	Not elsewhere included	Total
West Coast	Number	7176	3558	867	855	12459
	Percentage	57.6	28.6	7.0	6.9	100.0
New Zealand	Number	743955	451965	167925	90333	1454178
	Percentage	51.2	31.1	11.6	6.2	100.0

2.6 Communications and Transport

Access to telecommunication overall on the West Coast is in line with national levels. However access to some types of telecommunications is lower, these include: cell phone (68.5% compared to 71.1% nationally) and internet (52.8% compared to 58.0% nationally).

Access to a motor vehicle in the West Coast DHB is similar to national levels.

3 HEALTH STATUS

An understanding of the general health status of a population is important for ensuring the provision of adequate health services. This information is also important for determining priority issues for the District Health Board. This chapter presents information about health status for people living in the West Coast DHB district, in comparison to all New Zealanders.

Key points

Avoidable mortality and hospitalisation

- There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable mortality.
- Ischaemic heart disease was the leading cause of avoidable mortality for Māori, compared to suicide and self-inflicted injuries for non-Māori.
- There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable hospitalisations in the DHB.
- Respiratory infections, dental conditions, and ENT infections were three of the five leading causes of avoidable hospitalisations for both Māori and non-Māori.
- The age-standardised rates for unintentional injury mortality in the DHB were not statistically significantly different from the national rates.
- The Māori age-standardised rates for unintentional injury hospitalisation in the DHB were not statistically significantly different from the non-Māori rates.

Children

- Four of the top five leading causes of hospitalisations for Māori and non-Māori children 0-4 years were similar: respiratory infections, disorders related to length of gestation and fetal growth, persons encountering health services in other circumstances, and gastro-oesophageal reflux disease.
- For both Māori and non-Māori children aged 5-14 years, leading causes of hospitalisation were: asthma, dental conditions, respiratory infections, injuries to the elbow and forearm, and ENT infections.

Older People

- COPD, disorders of lens, disorders of gallbladder, biliary tract and pancreas, and stroke were leading causes of hospitalisations for Māori 65+ years of age, compared to respiratory infections, COPD, disorders of lens, and angina for non-Māori.
- Angina and ischaemic heart disease were leading causes of hospitalisation for males 65+ years of age, not for females.

Other health conditions

- The COPD hospitalisation rate for Māori was statistically significantly higher than the non-Māori rate as well as between West Coast DHB and the national rate.
- The unintentional injury hospitalisation rate for Māori youths (15-24 years) was statistically significantly higher than that for non-Māori.

- In the West Coast DHB, the rate of hospital admissions due to falls was statistically significantly lower for children 0-14 years than the national rate.

3.1 Avoidable Mortality

There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable mortality (Table 3.1).

Table 3.1: Avoidable mortality, 0-74 years, age-standardised rates per 100,000 (and 95% confidence intervals), 2006-08

		Māori			non-Māori			Total		
		ASR	95% confidence		ASR	95% confidence		ASR	95% confidence	
West Coast	Female	76.8	-278.9	- 432.6	97.6	-62.0	- 257.2	92.5	-47.5	- 232.5
	Male	305.4	-535.3	- 1146.1	150.5	-19.5	- 320.4	163.4	-4.5	- 331.3
	Total	187.2	-251.1	- 625.4	125.2	8.1	- 242.2	128.8	19.2	- 238.4
New Zealand	Female	214.6	168.7	- 260.5	74.2	63.5	- 84.8	88.9	78.2	- 99.6
	Male	308.9	251.4	- 366.5	122.9	109.1	- 136.7	142.4	128.6	- 156.1
	Total	259.8	223.3	- 296.3	98.1	89.4	- 106.8	115.1	106.4	- 123.8

3.2 Leading Causes of Avoidable Mortality

Ischaemic heart disease was the leading cause of avoidable mortality for Māori, compared to suicide and self-inflicted injuries for non-Māori (Table 3.2).

Table 3.2: Leading causes of avoidable mortality, ethnicity, 0-74 years, 2006-08

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Māori	Ischaemic heart disease	1	Ischaemic heart disease	1
	*	2	Lung cancer	2

	*	4	Motor vehicle accidents	4
	*	5	Suicide and self-inflicted injuries	5
non-Māori	Suicide and self-inflicted injuries	1	Ischaemic heart disease	1
	Motor vehicle accidents	2	Suicide and self-inflicted injuries	2
	Ischaemic heart disease	3	Lung cancer	3
	Birth defects	4	Motor vehicle accidents	4
	Lung cancer	5	Colorectal cancer	5

Note: *Leading causes are only listed where the number of deaths is greater than or equal to five. An asterisk (*) indicates that leading cause information is not available because of insufficient numbers.

For females in the West Coast DHB, the three leading cause of avoidable mortality were suicide and self-inflicted injuries, and breast and lung cancer compared to breast cancer, lung cancer and ischaemic heart disease nationally (Table 3.3). The three leading causes of avoidable mortality for males (i.e., ischaemic heart disease, suicide and self-inflicted injuries, and motor vehicle accidents) in the DHB were the same as for males nationally.

Table 3.3: Leading causes of avoidable mortality, gender, 0-74 years, 2006-08

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank

	Motor vehicle accidents	3	Lung cancer	3
	Birth defects	4	Motor vehicle accidents	4
	Lung cancer	5	Diabetes	5

3.3 Avoidable Hospitalisations

There was no statistically significant difference between the Māori and non-Māori age-standardised rates for avoidable hospitalisations in the DHB (Table 3.4).

Table 3.4: Avoidable hospitalisations, 0-74 years, age-standardised rates per 100,000 (and 95% confidence intervals), 2007-09

		Māori			non-Māori			Total		
		ASR	95% confidence		ASR	95% confidence		ASR	95% confidence	
West Coast	Female	3661.8	672.8	- 6650.8	2944.2	1893.0	- 3995.3	3020.2	2038.3	- 4002.1
	Male	3703.3	894.5	- 6512.0	3376.2	2297.6	- 4454.8	3406.5	2413.2	- 4399.8

3.4 Leading Causes of Avoidable Hospitalisations

Respiratory infections, dental conditions, and ENT infections were three of the five leading causes of avoidable hospitalisations for both Māori and non-Māori (Table 3.5). For Māori, the other leading causes were asthma and diabetes, compared to gastroenteritis and obstructed hernia for non-Māori.

Table 3.5: Leading causes of avoidable hospitalisations, ethnicity, 0-74 years

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Māori	Respiratory infections	1	Respiratory infections	1
	Dental conditions	2	Dental conditions	2
	Asthma	3	Asthma	3
	ENT infections	4	ENT infections	4
	Diabetes	5	Angina	5
non-Māori	Respiratory infections	1	Respiratory infections	1
	Gastroenteritis	2	Gastroenteritis	2
	Dental conditions	3	ENT infections	3
	Obstructed hernia	4	Dental conditions	4
	ENT infections	5	Angina	5

Note: ENT infections= ear, nose and throat infections

Respiratory infections, dental conditions, and gastroenteritis were leading causes of avoidable hospitalisations for both females and males in the DHB and nationally (Table 3.6). However, for females, sexually-transmitted diseases and asthma were other leading causes compared to obstructive hernia and ENT infections for males.

Table 3.6: Leading causes of avoidable hospitalisations, gender, 0-74 years, 2007-09

	West Coast DHB		New Zealand

	ENT infections	5	Angina	5

Note: ENT infections= ear, nose and throat infections

3.5 Unintentional Injury Mortality

The age-standardised rates for unintentional injury mortality in the DHB were not statistically significantly different from the national rates (Table 3.7).

Table 3.7: Unintentional injury mortality, all ages, age-standardised rates per 100,000 (and 95% confidence intervals), 2006-08

		Māori			non-Māori			Total		
		ASR	95% confidence		ASR	95% confidence		ASR	95% confidence

3.7 Child Health (0-14 years)

3.7.1 Leading causes of hospitalisations for children 0-4 years by ethnicity

Four of the top five leading causes of hospitalisations for Māori and non-Māori children 0-4 years were similar (Table 3.9): respiratory infections, disorders related to length of gestation and fetal growth, persons encountering health services in other circumstances, and gastro-oesophageal reflux disease.

Table 3.9: Leading causes of hospitalisations, ethnicity, 0-4 years, 2007-09

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Māori	Respiratory infections	1	Respiratory infections	1

non-Māori	Respiratory infections	1	Persons encountering health services in other circumstances	1
	Persons encountering health services in other circumstances	2	Respiratory infections	2
	Gastro-oesophageal reflux disease	3	Disorders related to length of gestation and fetal growth	3
	Disorders related to length of gestation and fetal growth	4	Gastro-oesophageal reflux disease	4
	Respiratory and cardiovascular disorders specific to the perinatal period	5	ENT infections	5

Note: ENT infections= ear, nose and throat infections

*Persons encountering health services in other circumstances (Z70-Z76). For example, health supervision and care of other healthy infant and child.

3.7.2 Leading causes of hospitalisations for children 0-4 years by gender

Both females and males aged 0-4 years had similar major causes of hospitalisations (Table 3.10).

Table 3.10: Leading causes of hospitalisations, gender, 0-4 years, 2007-09

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Female	Respiratory infections	1	Persons encountering health services in other circumstances	1
	*Persons encountering health services in other circumstances	2	Respiratory infections	2
	Gastro-oesophageal reflux disease	3	Disorders related to length of gestation and fetal growth	3
	Dental conditions	4	Gastro-oesophageal reflux disease	4

	Gastro-oesophageal reflux disease	3	Disorders related to length of gestation and fetal growth	3
	Disorders related to length of gestation and fetal growth	4	Gastro-oesophageal reflux disease	4
	Respiratory and cardiovascular disorders specific to the perinatal period	5	ENT infections	5
Total	Respiratory infections	1	Respiratory infections	1
	Persons encountering health services in other circumstances	2	Persons encountering health services in other circumstances	2
	Gastro-oesophageal reflux disease	3	Disorders related to length of gestation and fetal growth	3
	Disorders related to length of gestation and fetal growth	4	Gastro-oesophageal reflux disease	4
	Respiratory and cardiovascular disorders specific to the perinatal period	5	ENT infections	5

Note: ENT infections= ear, nose and throat infections

*Persons encountering health services in other circumstances (Z70-Z76). For example, health supervision and care of other healthy infant and child.

3.7.3 Leading causes of hospitalisations for children 5-14 years by ethnicity

For both Māori and non-Māori children aged 5-14 years, leading causes of hospitalisation were: asthma, dental conditions, respiratory infections, injuries to the elbow and forearm, and ENT infections (Table 3.11).

Table 3.11: Leading causes of hospitalisations, ethnicity, 5-14 years, 2007-09

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Māori	Asthma	1	Dental conditions	1
	Dental conditions	2	Respiratory infections	2
	Respiratory infections	3	ENT infections	3
	ENT infections	4	Injuries to the elbow and forearm	4
	Injuries to the elbow and forearm	5	Persons encountering health services for specific procedures and health care	5
non-Māori	Respiratory infections	1	Respiratory infections	1
	Dental conditions	2	Dental conditions	2
	Injuries to the elbow and forearm	3	Injuries to the elbow and forearm	3
	*Persons encountering health services for specific procedures and health care	4	ENT infections	4
	ENT infections	5	Persons encountering health services for specific procedures and health care	5

Note: ENT infections= ear, nose and throat infections

* Persons encountering health services for specific procedures and health care (Z40-Z54) - are intended for use to indicate a reason for care. They may be used for patients who have already been treated for a disease or injury, but who are receiving follow-up or prophylactic care, convalescent care, or care to consolidate the treatment, to deal with residual states, to ensure that the condition has not recurred, or to prevent recurrence.

3.7.4 Leading causes of hospitalisations for children 5-14 years by gender

Females and males aged 5-14 years have similar major causes of hospitalisation: dental conditions, respiratory infections, injuries to the elbow and forearm, ENT infections, and asthma (Table 3.12).

Table 3.12: Leading causes of hospitalisations, gender, 5-14 years, 2007-09

	ENT infections	5	Persons encountering health services for specific procedures and health care	5

Note: ENT infections= ear, nose and throat infections

* Persons encountering health services for specific procedures and health care (Z40-Z54) - are intended for use to indicate a reason for care. They may be used for patients who have already been treated for a disease or injury, but who are receiving follow-up or prophylactic care, convalescent care, or care to consolidate the treatment, to deal with residual states, to ensure that the condition has not recurred, or to prevent recurrence.

3.8 Older People's Health (65+ years)

3.8.1 Older people, leading causes of mortality, 65+ years by ethnicity

Older non-Māori in the DHB and nationally had the same leading causes of mortality: ischaemic heart disease, COPD, stroke, lung and colorectal cancers (Table 3.13).

Table 3.13: Leading causes of mortality, ethnicity, 65+ years, 2006-08

	West Coast DHB		New Zealand

	COPD	2	Stroke	2
	Lung cancer	3	COPD	3
	Stroke	4	Lung cancer	4
	Colorectal cancer	5	Colorectal cancer	5

Note: COPD=chronic obstructive pulmonary disease

3.8.3 Older people, leading causes hospitalisation, 65+ years by ethnicity

COPD, disorders of lens, disorders of gallbladder, biliary tract and pancreas, and stroke were leading causes of hospitalisations for Māori 65+ years of age, compared to respiratory infections, COPD, disorders of lens, and angina for non-Māori (Table 3.15).

Table 3.15: Leading causes of hospitalisations, ethnicity, 65+ years, 2007-09

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Māori	COPD	1	Persons encountering health services for specific procedures and health care	1
	Disorders of lens	2	COPD	2
	Disorders of gallbladder, biliary tract and pancreas	3	Respiratory infections	3
	*Persons encountering health services for specific procedures and health care	4	Diabetes	4
	Stroke	5	Angina	5
non-Māori	Persons encountering health services for specific procedures and health care	1	Persons encountering health services for specific procedures and health care	1
	Respiratory infections	2	Angina	2
	COPD	3	Respiratory infections	3
	Disorders of lens	4	Ischaemic heart disease	4
	Angina	5	Other forms of heart disease	5

Note: COPD=chronic obstructive pulmonary disease

* Persons encountering health services for specific procedures and health care (Z40-Z54) - are intended for use to indicate a reason for care. They may be used for patients who have already been treated for a disease or injury, but who are receiving follow-up or prophylactic care, convalescent care, or care to consolidate the treatment, to deal with residual states, to ensure that the condition has not recurred, or to prevent recurrence.

3.8.4 Older people, leading causes of hospitalisation, 65+ years by gender

Angina and ischaemic heart disease were leading causes of hospitalisation for males 65+ years of age, not for females (Table 3.16).

Table 3.16: Leading causes of hospitalisations, gender, 65+ years, 2007-09

	West Coast DHB		New Zealand	
	Condition	Rank	Condition	Rank
Female	*Persons encountering health services for specific procedures and health care	1	Persons encountering health services for specific procedures and health care	1
	Disorders of lens	2	Angina	2
	COPD	3	Respiratory infections	3
	Respiratory infections	4	COPD	4
	**Persons encountering health services for examination and investigation	5	Other forms of heart disease	5
Male	Respiratory infections	1	Persons encountering health services for specific procedures and health care	1
	Angina	2	Angina	2
	COPD	3	Respiratory infections	3
	Ischaemic heart disease	4	Ischaemic heart disease	4
	Other diseases of intestines	5	Other forms of heart disease	5
Total	Persons encountering health services for specific procedures and health care	1	Persons encountering health services for specific procedures and health care	1
	Respiratory infections	2	Angina	2
	COPD	3	Respiratory infections	3
	Disorders of lens	4	Ischaemic heart disease	4
	Angina	5	Other forms of heart disease	5

Note: COPD=chronic obstructive pulmonary disease

* Persons encountering health services for specific procedures and health care (Z40-Z54) - are intended for use to indicate a reason for care. They may be used for patients who have already been treated for a disease or injury, but who are receiving follow-up or prophylactic care, convalescent care, or care to consolidate the treatment, to deal with residual states, to ensure that the condition has not recurred, or to prevent recurrence. **Persons encountering health services for examination and investigation (Z00-Z13). For example, general medical examination or routine child health examination.

3.9 Other Health Conditions

Further data on other conditions in West Coast DHB are available in the appendices 2-4. Key points are listed here.

3.9.1 Chronic conditions

The COPD hospitalisation rate for Māori was statistically significantly higher than the non-Māori rate as well as between West Coast DHB and the national rate (Appendix 3: Table 3.1.27).

3.9.2 Other conditions

The unintentional injury hospitalisation rate for Māori youths (15-24 years) was statistically significantly higher than that for non-Māori (Appendix 3: Table 3.1.14).

In the West Coast DHB, the rate of hospital admissions due to falls was statistically significantly lower for children 0-14 years than the national rate (Appendix 3: Table 3.1.31).

4 HEALTH SERVICE UTILISATION

New Zealanders have access to a variety of health care workers and services in the health and disability sector. This chapter presents information on the use of these services within the West Coast DHB compared to the national experience.

Information about service utilisation is an important part of understanding the need and demand for health and disability services. This information, when considered in relation to information in other chapters of this HNA, provides evidence for decision making on DHB priorities for health and disability services.

Recent data was only available for a small number of measures, these being immunisation and screening.

Key points

- The immunisation coverage for Māori in the West Coast DHB was similar to the national rate, whereas the non-Māori coverage was considerably lower than the New Zealand average.
- Influenza vaccine coverage for Māori 65+ years of age was considerable higher than the national average, whereas the converse occurred for non-Māori.
- Both the Māori and non-Māori breast screen coverage were considerably higher than the overall New Zealand coverage.
- The Māori cervical cancer screening rate was lower than the national Māori average as well as the non-Māori coverage.

4.1 Immunisation Coverage at 2 Years

Fully immunised at age two years means that a child has received the vaccinations scheduled for ages 6 weeks, 3 months, 5 months and 15 months.

The immunisation coverage for Māori in the West Coast DHB was similar to the national rate, whereas the non-Māori coverage was considerably lower than the New Zealand average (Table 4.1).

Table 4.1: Full immunisation coverage at two years, percent, ethnicity, 2009-10

DHB	Māori	non-Māori	Total
West Coast DHB	72.2%	76.8%	76.2%
New Zealand	72.0%	79.4%	77.7%

4.2 Influenza Vaccine Coverage at 65+ Years

Influenza vaccine coverage for Māori 65+ years of age was considerable higher than the national average, whereas the converse occurred for non-Māori (Table 4.2).

Table 4.2: Influenza vaccinations in the last 12 months, 65+ years, percent, ethnicity, 2009-10

DHB	Māori	non-Māori	Total
West Coast DHB	63.2%	51.5%	51.5%
New Zealand	54.4%	60.9%	60.5%

4.3 Breast Cancer Screening

Both the Māori and non-Māori breast screen coverage were considerably higher than the overall New Zealand coverage (Table 4.3).

Table 4.3: Breast screening coverage, 50-64 years, percent, ethnicity, 2009-10

DHB	Māori	non-Māori	Total
West Coast DHB	69.3%	77.5%	77.5%
New Zealand	51.5%	65.0%	63.7%

4.4 Cervical Cancer Screening

The Māori cervical cancer screening rate was lower than the national Māori average as well as the non-Māori coverage (Table 4.4).

Table 4.4: Had cervical smear in the last three years, 20-69 years, percent, ethnicity, 2009-10

DHB	Māori	non-Māori	Total
West Coast DHB	51.8%	74.4%	83.1%
New Zealand	54.4%	75.5%	72.6%

All figures are for the census usually resident population.

* Percentages are calculated using 'Total People Stated' as the denominator. These will add up to >100 where individuals have identified as belonging to more than one ethnic group.

**Percentage for 'Total People Stated' and 'Total People not Included Elsewhere' uses 'Total Population as the Denominator

***Total People not included elsewhere refers to all those who did not state an ethnicity

Table 1.4.5: Male Population by Ethnicity (2006 Census)

West Coast	Number	372	10,887	3,651	14,910	597	4,548	633	1,272	1,293	8,349	1,668	24,927
	Percentage	2.5	73.0	24.5	64.1	7.2	54.5	7.6	15.2	15.5	35.9		
New Zealand	Number	48,177	1,381,293	379,956	1,809,426	86,733	693,597	78,960	137,205	147,381	1,143,873	207,075	3,160,371
	Percentage	2.7	76.3	21.0	61*	7.6	60.6	6.9	12.0	12.9	39*		

* % of total - 'not stated'

(1) All figures are for the census usually resident population aged 15 years and over.

(2) Includes Partnered, Not Further Defined and Civil Union Partner. For further information, refer to the social marital status variable on the 2006 Census Information About Data web page: <http://www.stats.govt.nz/census/>.

(3) Applies only to married people, not those in civil unions.

(4) Living as Married: ie in a consensual union, de facto relationship etc.

(5) Includes people who are still legally married but permanently separated. Includes civil unions.

Note: This data has been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.5.3: Family Type (2006 Census)

		Family Type			
Location	Unit	Couple without children	Couple with child(ren)	One parent with child(ren)	Total
West Coast	Number	3,804	3,201	1,275	8,277
	Percentage	46.0	38.7	15.4	
New Zealand	Number	425,973	447,894	193,635	1,067,502
	Percentage	39.9	42.0	18.1	

(1) All figures are for families in private occupied dwellings.

Note: This data has been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.5.4: Household Composition (2006 Census)

		Household composition						
Location	Unit	One-family household (with or without other people)	Two-family household (with or without other people)	Three-or-more family household (with or without other people)	Other multiperson household	One-person household	Household composition unidentifiable	Total
West Coast	Number	83,859	2,727	153	5,904	27,462	2,796	122,901
	Percentage	68.2	2.2	0.1	4.8	22.3	2.3	
New Zealand	Number	985,542	37,083	2,526	72,657	328,299	28,065	1,454,175
	Percentage	67.8	2.6	0.2	5.0	22.6	1.9	

(1) All figures are for households in private occupied dwellings.

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.5.5: Number of Languages Spoken (2006 Census)

		Number of Languages Spoken								
Location	Unit	None	One	Two	Three	Four	Five	Six	Not elsewhere included(2)	Total
West Coast	Number	483	27,654	1,365	225	93	24	3	1,482	31,329
	Percentage	1.5	88.3	4.4	0.7	0.3	0.1	0.0	4.7

	Percentage	0.5	3.2	6.6	8.5	15.9	9.5	7.6	6.8
New Zealand	Number	17,355	145,053	221,166	226,797	355,899	260,082	219,657	215,301
	Percentage	0.5	4.6	7.0	7.2	11.3	8.2	7.0	6.8

Location	Unit	Total personal income							Total
		\$30,001– \$35,000	\$35,001– \$40,000	\$40,001– \$50,000	\$50,001– \$70,000	\$70,001– \$100,000	\$100,001 or more	Not stated	
West Coast	Number	1,545	1,431	1,893	1,929	540	396	2,580	24,930
	Percentage	6.2	5.7	7.6	7.7	2.2	1.6	10.4	
New Zealand	Number	201,300	202,770	262,299	281,157	125,118	105,525	320,892	3,160,371
	Percentage	6.4	6.4	8.3	8.9	4.0	3.3	10.2	

(1) All figures are for the census usually resident population aged 15 years and over.

(2) Total personal income relates to the 12 months ending 31 March 2006.

Note: This data has been randomly rounded to protect confidentiality. Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.3: Sources of Personal Income (2006 Census)

Sources of Personal Income								
Location	Unit	No source of income during that time	Wages, salary, commissions, bonuses etc	Self-employment or business	Interest, dividends, rent, other investments	Payments from a work accident insurer	NZ Superannuation or veterans pension	Other Superannuation, pensions, annuities
West Coast	Number	960	13,764	4,242	4,515	498	4,089	498
	Percentage	3.9	55.2	17.0	18.1	2.0	16.4	2.0
New Zealand	Number	175,680	1,775,343	492,024	714,732	45,114	439,686	83,265
	Percentage	5.6	56.2	15.6	22.6	1.4	13.9	2.6

Sources of Personal Income										
Location	Unit	Unemployment benefit	Sickness benefit	Domestic purposes benefit	Invalids benefit	Student allowance	Other government benefits, payments or pension	Other sources of income	Not stated	Total
West Coast	Number	1,011	564	741	1,107	207	642	333	1,512	24,930
	Percentage	4.1	2.3	3.0	4.4	0.8	2.6	1.3	6.1	
New Zealand	Number	92,169	70,554	93,090	75,357	64,284	96,357	66,411	198,135	3,160,371
	Percentage	2.9	2.2	2.9	2.4	2.0	3.0	2.1	6.3	

(1) All figures are for the census usually resident population aged 15 years and over.

(2) Sources of personal income relates to the 12 months ending 7 March 2006.

(3) Includes all of the people who stated each source of personal income, whether as their only source of personal income or as one of several sources of personal income.

Where a person reported more than one source of personal income, they have been counted in each applicable group.

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.4: Work and Labour Force Status (2006 Census)

Work and Labour Force Status (2006 Census)									
Location	Unit	Employed full time	Employed part time	Total employed	Unemployed	Total labour force	Not in the labour force	Work and labour force status unidentifiable	Total
West Coast	Number	12,282	3,957	16,236	555	16,794	7,401	738	24,930
	Percentage	75.7	24.4	96.7	3.3	67.4	29.7	3.0	
New Zealand	Number	1,531,020	454,758	1,985,775	106,497	2,092,275	961,788	106,311	3,160,371
	Percentage	77.1	22.9	94.9	5.1	66.2	30.4	3.4	

(1) All figures are for the census usually resident population aged 15 years and over.

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.5: Occupation - ANZSCO V1.0 Major Group (2006 Census)

Location	Unit	Occupation (ANZSCO)								
		Managers	Professionals	Technicians and trades workers	Community and personal service workers	Clerical and administrative workers	Sales workers	Machinery operators and drivers	Labourers	Not elsewhere included(3)
West Coast	Number	2,856	2,052	1,890	1,389	1,512	1,128	1,533	2,682	1,191
	Percentage	17.6	12.6	11.6	8.6	9.3	7.0	9.4	16.5	7.3
New Zealand	Number	340,530	374,328	241,857	156,468	240,813	186,057	114,324	218,991	112,404
	Percentage	17.1	18.9	12.2	7.9	12.1	9.4	5.8	11.0	5.7

(1) All figures are for the employed census usually resident population aged 15 years and over.

(2) Australian and New Zealand Standard Classification of Occupations (ANZSCO V1.0).

(3) Includes Response Unidentifiable, Response Outside Scope and Not Stated.

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.6: Access to Telecommunications (2006 Census)

Location	Unit	Type of Telecommunication							
		Access to a cellphone / mobile phone	Access to a telephone	Access to a fax machine	Access to the Internet	No access to telecommunication systems	Total households stated	Total households, not elsewhere included(3)	Total households
West Coast	Number	10,458	13,437	3,870	8,067	294	14,805	465	15,267
	Percentage	68.5	88.0	25.4	52.8	1.9	97.0	3.1	
New Zealand	Number	1,034,529	1,277,325	362,040	843,738	28,407	1,393,707	60,468	1,454,175
	Percentage	71.1	87.8	24.9	58.0	2.0	95.8	4.2	

(1) All figures are for households in private occupied dwellings.

(2) Households reporting more than one means of access to telecommunication systems have been counted in each stated category. Therefore the total number of responses in the table will be greater than the total number of households.

(3) Includes Response Unidentifiable and Not Stated.

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.7: Number of Motor Vehicles per Household (2006 Census)

Location	Unit	Number of Motor Vehicles					Total
		No motor vehicle	One motor vehicle	Two motor vehicles	Three or more motor vehicles	Not elsewhere included(2)	
West Coast	Number	993	5,130	4,320	1,500	516	12,459
	Percentage	8.0	41.2	34.7	12.0	4.1	
New Zealand	Number	112,758	527,844	531,627	222,204	59,745	1,454,175
	Percentage	7.8	36.3	36.6	15.3	4.1	

(1) All figures are for households in private occupied dwellings.

(2) Includes Response Unidentifiable and Not Stated.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Table 1.6.8: Housing Tenure (2006 Census)

		Housing Tenure			
		Dwelling owned or partly owned by usual resident(s)			
Location	Unit	Mortgage arrangements not further defined	Mortgage payments made by owner/ usual resident(s)	Mortgage payments not made by owner/ usual resident(s)	Total, dwelling owned or partly owned by usual resident(s)
West Coast	Number	300	3,576	3,297	7,176
	Percentage	4.2	49.8	45.9	
New Zealand	Number	26,529	405,267	312,162	743,955
	Percentage	3.6	54.5	42.0	

		Housing Tenure			
		Dwelling not owned by usual resident(s)			
Location	Unit	Rental arrangements not further defined	Rent payments made by usual residents	Rent payments not made by usual residents	Total, dwelling not owned or partly owned by usual resident(s)
West Coast	Number	69	2,757	735	3,558
	Percentage	1.9	77.5	20.7	
New Zealand	Number	6,315	388,275	57,378	451,965
	Percentage	1.4	85.9	12.7	

		Housing Tenure					
		Dwelling held in a family trust by usual resident(s) ⁽²⁾				Not elsewhere included ⁽³⁾	Total
Location	Unit	Mortgage arrangements not further defined	Mortgage payments made by usual residents	Mortgage payments not made by usual residents	Total, dwelling held in a family trust by usual resident(s)		
West Coast	Number	90	234	546	867	855	12,459
	Percentage	10.4	27.0	63.0			
New Zealand	Number	13,386	72,828	81,711	167,925	90,333	
	Percentage	8.0	43.4	48.7			

(1) 'Tenure of household' refers to the nature of the occupancy of a household in a private dwelling, at the time of the survey. It does not refer to the tenure of the land on which the dwelling is situated.

(2) Information on family trusts was first collected in 2006.

(3) Includes Response Unidentifiable and Not Stated

Note: This data has been randomly rounded to protect confidentiality.

Individual figures may not add up to totals, and values for the same data may vary in different tables.

Appendix 2

Mortality Tables (2006-2008)

NOTE A: Counts less than 5 have ASR's presented as "0.0" or "#N/A"

NOTE B: There are two comparisons being made in the following tables

1. Māori Age-Standardised Rate against non-Māori Age-Standardised Rate
within the District Health Board:

Māori ASR statistically significantly higher than non-Māori ASR within DHB

Māori ASR statistically significantly lower than non-Māori ASR within DHB

2. District Health Board Age-Standardised Rate
against New Zealand Age-Standardised Rate:

DHB ASR statistically significantly higher than national ASR

DHB ASR statistically significantly lower than national ASR

Key:

DHB = District Health Board

ASR = Age-Standardised Rate

Table 2.1.1: Avoidable mortality, 0-74 years, age-standardised rates per 100,000 (and 95% confidence intervals), 2006-08

		Māori		non-Māori		Total	
		ASR	95% confidence	ASR	95% confidence	ASR	95% confidence
West Coast	Female	76.8	-278.9 - 432.6	97.6	-62.0 - 257.2	92.5	-47.5 - 232.5

Appendix 3

Hospitalisation Tables (2007-2009)

NOTE A: Counts less than 5 have ASR's presented as "0.0" or "#N/A"

NOTE B: There are two comparisons being made in the following tables

1. Māori Age-Standardised Rate against non-Māori Age-Standardised Rate
within the District Health Board:

Māori ASR statistically significantly higher than non-Māori ASR within DHB

Māori ASR statistically significantly lower than non-Māori ASR within DHB

2. District Health Board Age-Standardised Rate
against New Zealand Age-Standardised Rate:

DHB ASR statistically significantly higher than national ASR

DHB ASR statistically significantly lower than national ASR

Key:

DHB = District Health Board

ASR = Age-Standardised Rate

Table 3.1.1: Avoidable hospitalisations, 0-74 years, age-standardised rates per 100,000 (and 95% confidence intervals), 2007-09

Appendix 4

Cancer Registration Tables (2005-2007)

NOTE A: Counts less than 5 have ASR's presented as "0.0" or "#N/A"

NOTE B: There are two comparisons being made in the following tables

1. Māori Age-Standardised Rate against non-Māori Age-Standardised Rate
within the District Health Board:

Māori ASR statistically significantly higher than non-Māori ASR within DHB

Māori ASR statistically significantly lower than non-Māori ASR within DHB

2. District Health Board Age-Standardised Rate
against New Zealand Age-Standardised Rate:

DHB ASR statistically significantly higher than national ASR

DHB ASR statistically significantly lower than national ASR

Key:

DHB = District Health Board

ASR = Age-Standardised Rate

Table 4.1.1: Lung cancer registrations, 25+ years, age-standardised rates per 100,000 (and 95% confidence intervals), 2005-07

		Māori		non-Māori		Total	
		ASR	95% confidence	ASR	95% confidence	ASR	95% confidence
West Coast	Female	0.0	0.0 - 0.0	35.7	-2.7 - 74.0	35.6	-1.4 - 72.6
	Male	0.0	0.0 - 0.0	41.2	4.9 - 77.6	40.9	5.5 - 76.2
	Total	0.0	0.0 - 0.0	38.5	12.1 - 64.9	38.3	12.7 - 63.9
New Zealand	Female	91.7	72.1 - 111.2	22.7	19.8 - 25.5	28.1	25.1 - 31.2
	Male	91.7	71.0 - 112.5	32.1	28.8 - 35.4	36.5	33.1 - 40.0
	Total	91.6	77.4 - 105.9	27.0	24.8 - 29.2	31.9	29.6 - 34.2

Appendix 5

ICD-10 Codes

Description	ICD-10-AM codes used
I: Certain infectious and parasitic diseases	A00–B99
Intestinal infectious diseases	A00–A09
Tuberculosis (including late effects)	A15–A19, B90
Meningococcal infection	A39
Infections, sexual transmission	A50–A64
Viral hepatitis	B15–B19
HIV	B20–B24
Viral infection, unspecified, of unspecified site	B34.9
II: Neoplasms (cancer)	C00–D48
Malignant neoplasms	C00–C97
Lip, oral cavity and pharynx	C00–C14
Digestive organs	C15–C26
☛ Oesophagus	C15
☛ Cancer of stomach	C16
☛ Colorectal	C18–C21
☛ Cancer of colon	C18
☛ Rectum, rectosigmoid junction and anus	C19–C21
☛ Liver and intrahepatic bile ducts	C22
☛ Gallbladder, other and unspecified parts	C23–C24
☛ of biliary tract	
☛ Pancreas	C25
☛ Other digestive organs	C17, C26
Respiratory and intrathoracic organs	C30–C39
☛ Larynx	C32
☛ Trachea, bronchus and lung	C33–C34
☛ Other respiratory and intrathoracic organs	C30–C31, C37–C39
Bone and articular cartilage	C40–C41
Skin	C43–C44
☛ Melanoma of skin	C43
☛ Other malignant neoplasms of skin	C44
☛ Mesothelial and soft tissue	C45–C49
Breast: female	C50 & female
Breast: male	C50 & male
Female genital organs	C51–C58
☛ Cervix uteri	C53
☛ Uterus	C54–C55
☛ Ovary	C56
☛ Other female genital organs	C51–C52, C57–C58
Male genital organs	C60–C63
☛ Prostate	C61
☛ Testis	C62
☛ Other male genital organs	C60, C63
Urinary tract	C64–C68
☛ Kidney, except renal pelvis	C64
☛ Bladder	C67
☛ Other urinary tract	C65–C66, C68
Eye and other central nervous system	C69–C72
☛ Brain	C71

<ul style="list-style-type: none"> ☒ Personality and behavioural disorders due to brain disease, damage, and dysfunction 	F07
<ul style="list-style-type: none"> ☒ Mental and behavioural disorders due to psychoactive substance use 	F10–F19
<ul style="list-style-type: none"> ☒ Alcohol 	F10
<ul style="list-style-type: none"> ☒ Opioids 	F11
<ul style="list-style-type: none"> ☒ Cannabinoids 	F12

Description	ICD-10-AM codes used
Schizophrenia, schizotypal and delusional disorders	F20–F29
☛ Schizophrenia	F20
☛ Schizoaffective disorders	F25
Mood (affective) disorders	F30–F39
☛ Manic episode and bipolar affective disorder	F30–F31
☛ Manic episode	F30
☛ Bipolar affective disorder	F31
☛ Depressive episode and recurrent, and persistent mood [affective] disorders	F32–F34
☛ Depressive episode	F32
☛ Recurrent depressive disorder	F33
☛ Persistent mood [affective] disorders	F34
Neurotic, stress-related and somatoform disorders	F40–F48
Eating disorders	F50
Disorders of adult personality and behaviour	F60–F69
Mental retardation	F70–F79
VI: Diseases of the nervous system	G00–G99
Bacterial meningitis, not elsewhere classified	G00
Parkinson's disease, secondary Parkinsonism	G20–G21
Alzheimer's disease	G30
Epilepsy, status epilepticus	G40–G41
Migraine	G43
Transient cerebral ischemic attacks and related syndromes	G45
Mononeuropathies of upper limb	G56
Infantile cerebral palsy	G80
VII: Diseases of the eye and adnexa	H00–H59
Disorders of lens	H25–H28
Glaucoma	H40–H42
VIII: Diseases of the ear and mastoid process	H60–H95
Diseases of middle ear and mastoid	H65–H75
☛ Non-suppurative otitis media	H65
☛ Suppurative and unspecified otitis media	H66
☛ Perforation of tympanic membrane	H72
Hearing loss	H90–H91

Description	ICD-10-AM codes used
IX: Diseases of the circulatory system	I00–I99
Acute rheumatic fever	I00–I02
☛ Acute rheumatic heart disease	I01, I02.0
Chronic rheumatic heart disease	I05–I09
Hypertensive diseases	I10–I15
Ischemic heart disease	I20–I25
☛ Angina pectoris	I20
☛ Acute myocardial infarction	I21
☛ Chronic ischemic heart disease	I25
Pulmonary circulation	I26–I28
Other forms of heart disease	I30–I52
☛ Atrial fibrillation and flutter	I48
☛ Heart failure	I50
Cerebrovascular diseases	I60–I69
☛ Subarachnoid haemorrhage	I60
☛ Intracerebral haemorrhage, other nontraumatic intracranial haemorrhage	I61–I62
☛ Cerebral infarction, stroke, not specified as haemorrhage or infarction	I63–I64
Other diseases of the circulatory system	I70–I99
☛ Atherosclerosis	I70
☛ Varicose veins of lower extremities	I83
X: Diseases of the respiratory system	J00–J99
Acute upper respiratory infections	J00–J06
Pneumonia	J12–J18
Acute bronchitis and bronchiolitis	J20–J22
Chronic diseases of tonsils and adenoids	J35
Chronic obstructive respiratory disease	J40–J44
Asthma	J45–J46
Bronchiectasis	J47
XI: Diseases of the digestive system	K00–K93
Teeth and gums	K00–K08
☛ Disorders of tooth development and eruption, embedded and impacted teeth	K00–K01
☛ Dental caries	K02
☛ Diseases of pulp and periapical tissues	K04
☛ Periodontal diseases	K05–K06
Diseases of oesophagus, stomach and duodenum	K20–K31
☛ Diseases of oesophagus	K20–K22
☛ Gastric, duodenal, peptic gastrojejunal ulcers, gastritis duodenitis	K25–K29
Diseases of appendix	K35–K38
Hernia	K40–K46
☛ Inguinal hernia	K40
Non-infective gastroenteritis and colitis	K50–K52
Other diseases of intestines and diseases of peritoneum	K55–K67
Diseases of liver	K70–K77
☛ Alcoholic liver disease	K70

Description	ICD-10-AM codes used
Diseases of gallbladder, biliary tract and pancreas	K80–K87
Cholelithiasis	K80
Acute pancreatitis	K85
Other diseases of pancreas	K86
Haematemesis, melaena and gastrointestinal haemorrhage, unspecified	K92.0–K92.2
XII: Diseases of the skin and subcutaneous tissue	L00–L99
Infections of skin and subcutaneous tissue	L00–L08
XIII: Diseases of the musculoskeletal system and connective tissue	M00–M99
Gout	M10
Arthrosis (osteoarthritis)	M15–M19
Other dorsopathies	M50–M54
XIV: Diseases of the genitourinary system	N00–N99
Glomerular diseases	N00–N08
Tubulo-interstitial nephritis	N10–N12
Renal failure	N17–N19
Urolithiasis	N20–N23
Urinary tract infection, site not specified	N39.0
Stress incontinence and other specified urinary incontinence	N39.3, N39.4
☐ Stress incontinence	N39.3
Disorders of male genital organs	N40–N51
☐ Hyperplasia of prostate	N40
Inflammatory disorders of breast	N61
Inflammatory diseases of female pelvic organs	N70–N77
Non-inflammatory disorders of female genital tract	N80–N98
☐ Endometriosis	N80
☐ Female genital prolapse	N81
☐ Dysplasia of cervix uteri	N87
☐ Excessive and frequent menstruation	N92.0, N92.1
☐ Menopausal and other perimenopausal disorders	N95
XV: Pregnancy, childbirth and the puerperium	O00–O99
Abscess of breast associated with childbirth	O91.1
XVI: Certain conditions originating in the perinatal period	P00–P96
Slow fetal growth and fetal malnutrition and premature	P05–P07
☐ Slow fetal growth and fetal malnutrition	P05
☐ Premature	P07.2–P07.3
Birth trauma	P10–P15
Respiratory and cardiovascular disorders specific to the perinatal period	P20–P29

Description	ICD-10-AM codes used
☛ Birth asphyxia	P21
☛ Respiratory distress of newborn	P22
Infection specific to the perinatal period	P35–P39
XVII: Congenital malformations, deformations, and chromosomal abnormalities	Q00–Q99
XVIII: Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified	R00–R99
Symptoms and signs involving the circulatory and respiratory systems	R00–R09
Symptoms and signs involving the digestive system and abdomen	R10–R19
Symptoms and signs involving the urinary system	R30–R39
General symptoms and signs	R50–R69
Ill-defined and unknown causes of mortality	R95–R99
☛ Sudden infant death syndrome	R95
XIX: Injury, poisoning and certain other consequences of external causes	S00–T98
Injuries to the head	S00–S09
Other injuries	S10–T14
Burns	T20–T31
Poisoning by drugs, medicaments and biological substances	T36–T50
Complications of surgical and medical care, not elsewhere classified	T80–T88
XX: External causes of morbidity and mortality	V01–Y98
Accidents	V01–V99, W00–X59, Y85,
Transport accidents	V01–V99, Y85
☛ Pedestrian	V01–V09
☛ Pedal cyclist	V10–V19
☛ Other land transport (occupant of motorcycle, three-wheeled motor vehicle, car, pickup truck or van)	V20–V59, Y85.0
☛ Other transport	V90–V99, Y85.1
Other external causes of accidental injury	W00–X59, Y86
☛ Falls	W00–W19
☛ Exposure to mechanical forces	W20–W64
☛ Exposure to inanimate mechanical forces	W20–W49
☛ Exposure to animate mechanical forces	W50–W64
☛ Drowning and submersion (non transport)	W65–W74
☛ Fires	X00–X09
☛ Accidental poisoning by and exposure to noxious substances	X40–X49
☛ Accidental threats to breathing	W75–84
☛ Accidental suffocation or strangulation in bed	W75
Intentional self-harm (suicide)	X60–X84, Y87.0
Assault (homicide)	X85–Y09, Y87.1
Event of undetermined intent	Y10–Y34, Y87.2
Legal intervention	Y35, Y89.0

Description	ICD-10-AM codes used
Complications of medical and surgical care	Y40–Y84, Y88
☛ Drugs, medicaments and biological substances causing adverse effects in therapeutic use	Y40–Y59, Y88.0
☛ Misadventure to patients during surgical and medical care	Y60–Y69, Y88.1
☛ Medical devices associated with adverse incidents, abnormal reaction, without mention of misadventure at the time of the procedure	Y70–Y84, Y88.2, Y88.3
XXI: Factors influencing health status and contact with health services	Z00–Z99
Persons encountering health services for examination and investigation	Z00–Z13
Persons with potential health hazards related to communicable diseases	Z20–Z29
Persons encountering health services in circumstances related to reproduction	Z30–Z39
☛ Outcome of delivery	Z37
☛ Liveborn infants	Z38
Persons encountering health services for specific procedures and health care	Z40–Z54
☛ Care involving dialysis	Z49
☛ Care involving rehabilitation	Z50
Persons with potential health hazards related to socioeconomic and psychosocial circumstances	Z55–Z65
Persons encountering health services in other circumstances	Z70–Z76
Persons with potential health hazards related to family and personal history and certain conditions influencing health status	Z80–Z99
